

2011 Year-End Tax Planning

There is still time to reduce your 2011 tax bill and plan ahead for 2012. This letter highlights several potential tax-saving opportunities for you to consider. I would be happy to meet with you to discuss specific strategies.

As a general reminder, there are several ways in which you can file an income tax return: married filing jointly, head of household, single, and married filing separately. A husband and wife may elect to file one return reporting their combined income, computing the tax liability using the tax tables or rate schedules for "Married Persons Filing Jointly." If a married couple files separate returns, under certain situations they can amend and file jointly, but they cannot amend a jointly filed return and file separately. A joint return may be filed even though one spouse has neither gross income nor deductions. If one spouse dies during the year, the surviving spouse may file a joint return for the year in which his or her spouse died. Certain married persons who do not elect to file a joint return may be entitled to use the lower head of household tax rates. Generally, in order to qualify as a head of household, you must not be a resident alien, you must satisfy certain marital status requirements, and you must maintain a household for a qualifying child or any other person who is your dependent, if you are entitled to a dependency deduction for the taxable year for such person.

Basic Numbers You Need To Know

Because many tax benefits are tied to or limited by adjusted gross income (AGI)—IRA deductions, for example—a key aspect of tax planning is to estimate both your 2011 and 2012 AGI. Also, when considering whether to accelerate or defer income or deductions, you should be aware of the impact this action may have on your AGI and your ability to maximize itemized deductions that are tied to AGI. Your 2010 tax return and your 2011 pay stubs and other income- and deduction-related materials are a good starting point for estimating your AGI.

Another important number is your "tax bracket," i.e., the rate at which your last dollar of income is taxed. The tax rates for 2011 are 10%, 15%, 25%, 28%, 31%, and 35%. Although tax brackets are indexed for inflation, if your income increases faster than the inflation adjustment, you may be pushed into a higher bracket. If so, your potential benefit from any tax-saving opportunity is increased (as is the cost of overlooking that opportunity).

IRA, Retirement Savings Rules for 2011

Tax-saving opportunities continue for retirement planning due to the availability of Roth IRAs, changes that make regular IRAs more attractive, and other retirement savings incentives.

Traditional IRAs: Individuals who are not active participants in an employer pension plan may make deductible contributions to an IRA. The annual deductible contribution limit for an IRA for 2011 is \$5,000. For 2011, a \$1,000 “catch-up” contribution is allowed for taxpayers age 50 or older by the close of the taxable year, making the total limit \$6,000 for these individuals. Individuals who are active participants in an employer pension plan also may make deductible contributions to an IRA, but their contributions are limited in amount depending on their AGI. For 2011, the AGI phase-out range for deductibility of IRA contributions is between \$56,000 and \$66,000 of modified AGI for single persons (including heads of households), and between \$90,000 and \$110,000 of modified AGI for married filing jointly. Above these ranges, no deduction is allowed.

In addition, an individual will not be considered an “active participant” in an employer plan simply because the individual's spouse is an active participant for part of a plan year. Thus, you may be able to take the full deduction for an IRA contribution regardless of whether your spouse is covered by a plan at work, subject to a phase-out if your joint modified AGI is \$169,000 to \$179,000 for 2011. Above this range, no deduction is allowed.

Spousal IRA: If an individual files a joint return and has less compensation than his or her spouse, the IRA contribution is limited to the lesser of \$5,000 for 2011 plus age 50 catch-up contributions, or the total compensation of both spouses reduced by the other spouse's IRA contributions (traditional and Roth).

Roth IRA: This type of IRA permits nondeductible contributions of up to \$5,000 a year. Earnings grow tax-free, and distributions are tax-free provided no distributions are made until more than five years after the first contribution and the individual has reached age 59½. Distributions may be made earlier on account of the individual's disability or death. The maximum contribution is phased out in 2011 for persons with an AGI above certain amounts: \$169,000 to \$179,000 for married filing jointly, and \$107,000 to \$122,000 for single taxpayers (including heads of households); and between \$0 and \$10,000 for married filing separately who lived with the spouse during the year.

Roth IRA Conversion Rule: Funds in a traditional IRA (including SEPs and SIMPLE IRAs), §401(a) qualified retirement plan, §403(b) tax-sheltered annuity or §457 government plan may be rolled over into a Roth IRA. Such a rollover, however, is treated as a taxable event, and you will pay tax on the amount converted. No penalties will apply if all the requirements for such a transfer are satisfied.

In past years, a taxpayer's AGI (whether married filing jointly or single) was limited to \$100,000 to make such a conversion and the taxpayer must not be a married individual filing a separate return. The AGI limitation does not apply to

conversions from a Roth designated account in a §401 or §403(b) plan. For 2011, the \$100,000 income limit on Roth IRA conversions does not apply, and taxpayers will be able to make Roth IRA conversions without regard to their AGI. If you convert to a Roth IRA in 2011, the tax on the converted amount will have to be paid in the year of conversion. Also, if you already made a conversion earlier this year, you have the option of undoing the conversion. This is a useful strategy if the investments have gone down in value so that if you were to do the conversion now, your taxes would be lower. This is a complicated calculation and we should meet to determine what your best options are.

In addition, for 2011, if your §401(k) plan, §403(b) plan, or governmental §457(b) plan has a qualified designated Roth contribution program, a distribution to an employee (or a surviving spouse) from such account under the plan that is not a designated Roth account is permitted to be rolled over into a designated Roth account under the plan for the individual.

401(k) Contribution: The §401(k) elective deferral limit is \$16,500 for 2011. If your §401(k) plan has been amended to allow for catch-up contributions for 2011 and you will be 50 years old by December 31, 2011, you may contribute an additional \$5,500 to your §401(k) account, for a total maximum contribution of \$22,000 (\$16,500 in regular contributions plus \$5,500 in catch-up contributions).

SIMPLE Plan Contribution: The SIMPLE plan deferral limit is \$11,500 for 2011. If your SIMPLE plan has been amended to allow for catch-up contributions for 2011 and you will be 50 years old by December 31, 2011, you may contribute an additional \$2,500.

Catch-Up Contributions for Other Plans: If you will be 50 years old by December 31, 2011, you may contribute an additional \$5,500 to your §403(b) plan, SEP or eligible §457 government plan.

Saver's Credit: A nonrefundable tax credit is available based on the qualified retirement savings contributions to an employer plan made by an eligible individual. For 2011, only taxpayers filing joint returns with AGI of \$56,500 or less, head of household returns with AGI of \$42,375 or less, or single returns (or separate returns filed by married taxpayers) with AGI of \$28,250 or less, are eligible for the credit. The amount of the credit is equal to the applicable percentage (10% to 50%, based on filing status and AGI) of qualified retirement savings contributions up to \$2,000.

Required Minimum Distributions: For 2011, taxpayers must take their required minimum distribution from IRAs or defined contribution plans (§401(k) plans, §403(a) and (b) annuity plans, and §457(b) plans that are maintained by a governmental employer).

Maximize Retirement Savings: In many cases, employers will require you to set

your 2012 retirement contribution levels before January 2012. If you did not elect the maximum 401(k) contribution for 2011, you can increase your amount for the remainder of 2011 to lower your AGI in order to take advantage of some of the tax breaks described above. In addition, maximizing your contribution is generally a good tax-saving move.

Deduction Planning

Individual Deductions

Deduction timing is also an important element of year-end tax planning. Deduction planning is complex, however, due to factors such as AGI levels and filing status. If you are a cash-method taxpayer, remember to keep the following in mind:

Deduction in Year Paid: An expense is only deductible in the year in which it is actually paid. Under this rule, if your tax rate is going to increase in 2012, it is a smart strategy to postpone deductions until 2012.

Payment by Check: Date checks before the end of the year and mail them before January 1, 2012.

Promise to Pay: A promise to pay or providing a note does not permit you to deduct the expense. But you can take a deduction if you pay with money borrowed from a third party. Hence, if you pay by credit card in 2011, you can take the deduction even though you won't pay your credit card bill until 2012.

AGI Limits: For 2011, the overall limitation on itemized deductions is terminated. In addition, certain deductions may be claimed only if they exceed a percentage of AGI: 7.5% for medical expenses, 2% for miscellaneous itemized deductions, and 10% for casualty losses.

Standard Deduction Planning: Deduction planning is also affected by the standard deduction. For 2011 returns, the standard deduction is \$11,600 for married taxpayers filing jointly, \$5,800 for single taxpayers, \$8,500 for heads of households, and \$5,800 for married taxpayers filing separately. As you can see from the numbers, for 2011, the standard deduction for married taxpayers is twice the amount as that for single taxpayers. If your itemized deductions are relatively constant and are close to the standard deduction amount, you will obtain little or no benefit from itemizing your deductions each year. But simply taking the standard deduction each year means you lose the benefit of your itemized deductions. To maximize the benefits of both the standard deduction and itemized deductions, consider adjusting the timing of your deductible expenses so that they are higher in one year and lower in the following year. You can do this by paying in 2011 deductible expenses, such as mortgage interest due in January 2012.

Medical Expenses: Medical expenses, including amounts paid as health insurance premiums, are deductible only to the extent that they exceed 7.5% of AGI. Consider bunching medical expenses into years when your AGI is lower.

State Taxes: If you anticipate a state income tax liability for 2011 and plan to make an estimated payment, consider making the payment before the end of 2011. Note that in 2011, taxpayers may elect to deduct as an itemized deduction state and local sales taxes instead of state and local income taxes. This benefits taxpayers that reside in states without an income tax. This provision expires at the end of 2011, so you would want to take advantage of it now by making large purchases in 2011 rather than waiting until 2012.

Charitable Contributions: Consider making your charitable contributions at the end of the year. This will give you use of the money during the year and simultaneously permit you to claim a deduction for that year. You can use a credit card to charge donations in 2011 even though you will not pay the bill until 2012. A mere pledge to make a donation is not deductible, however, unless it is paid by the end of the year. Note, however, for claimed donations of cars, boats and airplanes of more than \$500, the amount available as a deduction will significantly depend on what the charity does with the donated property, not just the fair market value of the donated property. If the organization sells the property without any significant intervening use or material improvement to the property, the amount of the charitable contribution deduction cannot exceed the gross proceeds received from the sale.

To avoid capital gains, you may want to consider giving appreciated property to charity.

Regarding charitable contributions please remember the following rules: (1) no deduction is allowed for charitable contributions of clothing and household items if such items are not in good used condition or better; (2) the IRS may deny a deduction for any item with minimal monetary value; and (3) the restrictions in (1) and (2) do not apply to the contribution of any single clothing or household item for which a deduction of \$500 or more is claimed if the taxpayer includes a qualified appraisal with his or her return. Charitable contributions of money, regardless of the amount, will be denied a deduction, unless the donor maintains a cancelled check, bank record, or receipt from the donee organization showing the name of the donee organization, and the date and amount of the contribution.

A special provision gives taxpayers the ability to distribute tax-free to charity up to \$100,000 from a traditional or Roth IRA maintained for an individual whose has reached age 70 1/2. Ordinarily, such distributions would be taxable to the individual, who would not be able to offset the income fully because of the percentage limitations on charitable contribution deductions. This provision expires at the end of 2011, so you would want to take advantage of it now.

Business Deductions

Self-Employed Health Insurance Premiums: Self-employed individuals are allowed to claim 100% of the amount paid during the taxable year for insurance that constitutes medical care for themselves, their spouses and dependents as an above-the-line deduction, without regard to the 7.5% of AGI floor.

Equipment Purchases: If you are in business and purchase equipment, you may make a “Section 179 Election,” which allows you to expense (i.e., currently deduct) otherwise depreciable business property. For 2011, you may elect to expense up to \$500,000 of equipment costs (with a phase-out for purchases in excess of \$2,000,000) if the asset was placed in service during 2011. Also, certain real property can qualify for the expense deduction, but of the \$500,000 limitation, only \$250,000 can be attributed to qualified real property. Note that for assets placed in service in 2011, taxpayers can expense all of their business equipment purchases under a provision giving taxpayers 100% bonus depreciation, possibly negating the need for the §179 election.

In 2012, the dollar amounts for §179 expensing are scheduled to be \$139,000, with a phase-out amount of \$560,000. Also, the allowance for real property does not apply for 2012.

In addition, careful timing of equipment purchases can result in favorable depreciation deductions in 2011. In general, under the “half-year convention,” you may deduct six months worth of depreciation for equipment that is placed in service on or before the last day of the tax year. (If more than 40% of the cost of all personal property placed in service occurs during the last quarter of the year, however, a “mid-quarter convention” applies, which lowers your depreciation deduction.) A popular strategy in recent years is to purchase a vehicle for business purposes that exceeds the depreciation limits set by statute (i.e., a vehicle rated over 6,000 pounds). Doing so would not subject the purchase to the statutory dollar limit, \$11,060 for 2011 (due to bonus depreciation rules); \$11,260 in the case of vans and trucks (due to bonus depreciation rules). Therefore, the vehicle would qualify for the full equipment expensing dollar amount. However, for SUVs (rated between 6,000 and 14,000 pounds gross vehicle weight) the expensing amount is limited to \$25,000.

NOL Carryback Period: If your business suffers net operating losses for 2011, you generally apply those losses against taxable income going back two tax years. Thus, for example, the loss could be used to reduce taxable income—and thus generate tax refunds—for tax years as far back as 2009. Certain “eligible losses” can be carried back three years; farming losses can be carried back five years.

Bonus Depreciation: Taxpayers can claim 100% bonus depreciation for assets

placed in service in 2011. Bonus depreciation is also allowed for machinery and equipment used exclusively to collect, distribute, or recycle qualified reuse and recyclable materials and qualified disaster assistance property. In 2012, the bonus depreciation amount is scheduled to be reduced to 50%.

Education and Child Tax Benefits

Child Tax Credit: A tax credit of \$1,000 per qualifying child under the age of 17 is available on this year's return. In order to qualify for 2011, the taxpayer must be allowed a dependency deduction for the qualifying child. Another qualifying determination is that the qualifying child must be younger than you. The credit is phased out at a rate of \$50 for each \$1,000 (or fraction of \$1,000) of modified AGI exceeding the following amounts: \$110,000 for married filing jointly; \$55,000 for married filing separately; and \$75,000 for all other taxpayers. A portion of the credit may be refundable. For 2011, the threshold earned income level to determine refundability is set by statute at \$3,000.

Credit for Adoption Expenses: For 2011, the adoption credit limitation is \$13,360 of aggregate expenditures for each child, except that the credit for an adoption of a child with special needs is deemed to be \$13,360 regardless of the amount of expenses. The credit ratably phases out for taxpayers whose income is between \$185,210 and \$225,210. For 2011, the credit is refundable. For 2012, the credit is scheduled to become nonrefundable.

HOPE Credit and Lifetime Learning Credit: Back in 2009, significant changes were put in place for the HOPE, including a name change to the American Opportunity Tax Credit. These changes continue for 2011. The maximum credit for 2011 is \$2,500 (100% on the first \$2,000, plus 25% of the next \$2,000) for qualified tuition and fees paid on behalf of a student (i.e., the taxpayer, the taxpayer's spouse, or a dependent) who is enrolled on at least a half-time basis. The credit is available for the first four years of the student's post-secondary education. For 2011, the credit is phased out at modified AGI levels between \$160,000 and \$180,000 for joint filers, and between \$80,000 and \$90,000 for other taxpayers. Forty percent of the credit is refundable, which means that you can receive up to \$1,000 even if you owe no taxes. The term "qualified tuition and related expenses" includes expenditures for "course materials" (books, supplies, and equipment needed for a course of study whether or not the materials are purchased from the educational institution as a condition of enrollment or attendance). One way to take advantage of the credit for 2011 is to prepay the spring 2012's tuition. In addition, if your child's books for the spring semester are known, those can be bought and the costs qualify for the credit.

The Lifetime Learning credit maximum in 2011 is \$2,000 (20% of qualified tuition and fees up to \$10,000). A student need not be enrolled on at least a half-time basis so long as he or she is taking post-secondary classes to acquire or improve job skills. As with the HOPE (American Opportunity Tax Credit in 2011) credit,

eligible students include the taxpayer, the taxpayer's spouse, or a dependent. For 2011, the Lifetime Learning credit are phased out at modified AGI levels between \$102,000 and \$122,000 for joint filers, and between \$51,000 and \$61,000 for single taxpayers.

Coverdell Education Savings Account: For 2011, the aggregate annual contribution limit to a Coverdell education savings account is \$2,000 per designated beneficiary of the account. This limit is phased out for individual contributors with modified AGI between \$95,000 and \$110,000 and joint filers with modified AGI between \$190,000 and \$220,000. The contributions to the account are nondeductible but the earnings grow tax-free.

Student Loan Interest: You may be eligible for an above-the-line deduction for student loan interest paid on any "qualified education loan." The maximum deduction is \$2,500. The deduction for 2011 is phased out at a modified AGI level between \$120,000 and \$150,000 for joint filers, and between \$60,000 and \$75,000 for individual taxpayers.

Kiddie Tax: For 2011, the kiddie tax applies to: (1) children under 18; (2) 18-year old children who have unearned income in excess of the threshold amount, do not file a joint return and who have earned income, if any, that does not exceed one-half of the amount of the child's support; and (3) children between the ages of 19 and 23 and if, in addition to the above rules, they are full-time students. For 2011, the kiddie tax threshold amount is \$1,900.

Energy Incentives

Residential Energy Efficient Property Credit: Until 2016, tax incentives are available to taxpayers who install certain energy efficient property, such as photovoltaic panels, solar water heating property, fuel cell property, small wind energy property and geothermal heat pumps. A credit is available for the expenditures incurred for such property up to a specific percentage, except that a cap applies for fuel cell property. The property purchased cannot be used to heat swimming pools or hot tubs. If you have made improvements to your home or plan to by the end of 2011, please contact me to discuss the amount of the credit you may qualify for.

Nonbusiness Energy Property Credit: For 2011, property qualifying for the nonbusiness energy property credit includes windows (including skylights), exterior doors, insulation, metal roofs, advanced main air circulating fans, natural gas, propane, or oil furnace or hot water boilers, and other energy efficient building property that meets certain energy standards. For 2011, the credit is 10% of the cost of the improvement(s) up to a maximum credit of \$500 (therefore, if you took any credit prior to 2011, your total cannot exceed \$500). The property must be installed by the end of 2011 to qualify. For 2011, only \$200 of the credit can be applied to windows. Also, for 2011, the energy standards are

relaxed. The credit expires at the end of 2011.

Business Credits

Small Employer Pension Plan Startup Cost Credit: For 2011, certain small business employers that did not have a pension plan for the preceding three years may claim a nonrefundable income tax credit for expenses of establishing and administering a new retirement plan for employees. The credit applies to 50% in qualified administrative and retirement-education expenses for each of the first three plan years. However, the maximum credit is \$500 per year.

Employer-Provided Child Care Credit: For 2011, employers may claim a credit of up to \$150,000 for supporting employee child care or child care resource and referral services. The credit is allowed for a percentage of “qualified child care expenditures” including for property to be used as part of a qualified child care facility, for operating costs of a qualified child care facility and for resource and referral expenditures.

Work Opportunity Credit: The work opportunity credit is an incentive provided to employers who hire individuals in groups whose members historically have had difficulty obtaining employment. This gives your business an expanded opportunity to employ new workers and be eligible for a tax credit against the wages paid. Wages paid after 2011 are not eligible for the credit.

Credit for Employee Health Insurance Expenses of Small Employers: For tax years beginning after 2009, eligible small employers are allowed a credit for certain expenditures to provide health insurance coverage for its employees. Generally, employers with 10 or fewer full-time equivalent employees (FTEs) and an average annual per-employee wage of \$25,000 or less are eligible for the full credit. The credit amount begins to phase out for employers with either 11 FTEs or an average annual per-employee wage of more than \$25,000. The credit is phased out completely for employers with 25 or more FTEs or an average annual per-employee wage of \$50,000 or more. The credit amount is 35% of certain contributions made to purchase health insurance.

Investment Planning

The following rules apply for most capital assets in 2011:

- Capital gains on property held one year or less are taxed at an individual's ordinary income tax rate.
- Capital gains on property held for more than one year are taxed at a maximum rate of 15% (0% if an individual is in the 10% or 15% marginal tax bracket).

Note that Congress did extend the reduced capital gains rates, through 2012.

Timing of Sales: You may want to time the sale of assets so as to have offsetting capital losses and gains. Capital losses may be fully deducted against capital gains and also may offset up to \$3,000 of ordinary income (\$1,500 for married filing separately). In general, when you take losses, you must first match your long-term losses against your long-term gains, and short-term losses against short-term gains. If there are any remaining losses, you may use them to offset any remaining long-term or short-term gains, or up to \$3,000 (or \$1,500) of ordinary income. When and whether to recognize such losses should be analyzed in light of the possible future changes in the capital gains rates applicable to your specific investments.

Dividends: Qualifying dividends received in 2011 are subject to rates similar to the capital gains rates. Therefore, qualifying dividends are taxed at a maximum rate of 15%. Qualifying dividends include dividends received from domestic and certain foreign corporations. Note that Congress did extend the reduced dividend rates through 2012.

Social Security: Depending on the recipient's modified AGI and the amount of Social Security benefits, a percentage — up to 85% — of Social Security benefits may be taxed. To reduce that percentage, it may be beneficial to defer receipt of other retirement income. One way to do so is to elect to receive a lump sum distribution from a retirement plan and to rollover that distribution into an IRA. Alternatively, it may be beneficial to accelerate income so as to reduce the percentage of your Social Security taxed in 2012 and later years.

Other Tax Planning Opportunities: We also can discuss the potential benefits to you or your family members of other planning options available for 2011, including §529 qualified tuition programs.

Alternative Minimum Tax

For 2011, the alternative minimum tax exemption amounts will remain high enough to spare millions of taxpayers from the AMT effect. The exemption amounts in place for 2011 are: (1) \$74,450 for married individuals filing jointly and for surviving spouses; (2) \$48,450, for unmarried individuals other than surviving spouses; and (3) \$37,225 for married individuals filing a separate return. Also, for 2011, nonrefundable personal credits can offset an individual's regular and alternative minimum tax.

Some of the standard year-end planning ideas will not reduce tax liability if you are subject to the alternative minimum tax (AMT) because different rules apply. Because of the complexity of the AMT, it would be wise for us to analyze your AMT exposure.

If you have any questions, please do not hesitate to call. We would be happy to

meet with you at your convenience to discuss the strategies outlined above. While we are now into the new year, there is still time to implement these strategies to minimize your 2011 tax liability.

Sincerely,

ALAN L. GORDON, CPA, P.A.
